## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 6, 7, 8, 21, 22, and 23 are rejected under 35 U.S.C. 102(e) as being anticipated by Ryu (6,226,047).

Regarding claim 6, Ryu discloses an analog multiplexed signal containing controlled video image and OSD information (Figure 1, elements 110, 109, 108). In Ryu, the analog video signal L11 is processed at the transmitter end or at the video processing circuit 108. The processing operations inherently include independent contrast and gain controls. Such functions are found in all television processing circuits. Ryu further shows an OSD signal which is also inherently amplified by so means. The composite video signal in Ryu also includes vertical and horizontal blanking signals

Art Unit: 2614

which are being added to the active video signal at the transmission end. All these signals at the output of the mixing circuit 110 are in a time division multiplexed form.

Regarding claim 7, in addition of rejection to claim 6, Ryu further shows a transmission wire (output of the mixing circuit 110) which meets the signal medium as claimed.

Regarding claims 8, 21, 22, and 23, see the similar rejections as set forth above.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 10, 12, 25, 26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ryu (6,226,047).

Regarding claims 10, 12, 25, and 26, Ryu discloses all the features of the instant invention as set forth above except the recording medium as claimed. Recording video signals on a recording medium is well known in the art. For instance, video tape recorders or videodisc recorders enable video signals to be recorded for later viewing. This has greatly enhanced the viewing flexibility of a viewer. Hence, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to include a recording medium into Ryu so that the current received television program can be recorded for later watch.

***Allowable Subject Matter***

5. Claims 1-5, 9, 12-20, and 24 are allowed.

***Response to Arguments***

6. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
